LIBRARY EFFICIENCY TEST

JULIA A. ROBINSON

SECRETARY IOWA LIBRARY COMMISSION

AMERICAN LIBRARY ASSOCIATION C H I C A G O 1920

LIBRARY EFFICIENCY TEST

INTRODUCTION

The test here offered is not intended as a questionnaire for reply and return to the State Library Commission, but is suggested as a method by which a library board may be able to examine its library and reach some conclusion as to whether it is paying sufficient dividends upon the investment made by the donors of the building and the taxpayers who are supporting it.

The value of this test will depend upon the amount of information possessed by the library board on library buildings, library administration and library matters in general, and can be used to best advantage in conference with a librarian conversant with these subjects.

Where figures are not called for, it is suggested that a check mark (V) be used for an affirmative answer, a cross (+) for a negative and a (-) for a question which does not apply, leaving blank those which are not understood and can perhaps be filled later.

The measure of the efficiency of any library must be the measure of its usefulness, all else being plant and machinery and operators contributing to that end. Much of the usefulness of a library cannot be measured in figures but circulation is generally taken as the best method of showing the use of a library.

By it the increase or decrease in the books leaving the library can be shown as well as the per capita of books read by the population of the town. The latter furnishes a means of comparison between libraries, but this comparison is only useful for towns of the same size, as the per capita increases with a decrease in the size of a town. The same is true of the per capita income and the volumes per capita in the book collection. At the end is printed a "Summary" which has been found useful when there was not time for the full test.

JULIA A. ROBINSON.
